HADCO Group's Recycling Division Monthly E-Newsletter

## Sort and export! Understanding the types of waste material collected at New Age Recycling

At New Age Recycling (NAR), we collect and process approximately 6500 metric tons of waste material per year. This waste material is diverted from landfills and sustainably recycled.

We sort and export a wide variety of waste materials, which will eventually return to our shores in the form of new products.

NAR stands committed to helping close the recycling loop in Trinidad and Tobago, as well as earn valuable foreign exchange for the country in the process.

This month's newsletter aims to help you understand how we sort the waste material after collecting it from your premises.

We hope it inspires you to take a look around your workplace and see what you can recycle!

**AT NEW AGE  
RECYCLING,  
WE COLLECT AND  
PROCESS  
APPROXIMATELY  
6500 METRIC TONS  
OF WASTE MATERIAL  
PER YEAR. "**

what we sort  
below.**

# Types of waste material we collect

## Paper

At our facility, the wastepaper collected from your office or place of business is sorted into the following categories:

### Sorted office waste

This comprises of printed computer paper, letters, paper envelopes and shredded paper.

### Hard white paper

Plain white paper, containing no inks or prints.

### Coloured paper

Coloured paper containing inks and / or prints.

### Gold kraft

Manila folders, envelopes, paper bags and most brown paper cups.

### Bookends

All magazines and books, binded with glue at the spine.

### Newspaper / newsprint

Waste newspaper containing inks and prints.

# Types of waste material we collect

## Cardboard

### Old corrugated cardboard

Corrugated cardboard is commonly used in packaging and storage. You can find it in all forms such as cardboard boxes, shoe boxes, cereal boxes, the inners of toilet / kitchen rolls, egg cartons etc.

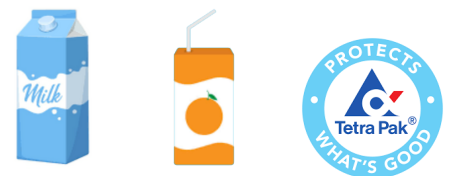

## Tetra Pak

### Waste Tetra Pak packaging

Tetra Pak is a very popular packaging made from a combination of cardboard, paper and aluminum components.

It is specially designed to preserve perishable liquids such as milk and juice.

You'll know the packaging is recyclable by looking for the Tetra Pak logo on the side of the box.

**Your wastepaper, cardboard and Tetra Pak materials are sent to both local and international recycling mills, who then turn your waste into new products!**
